## BIOGRAPHY

In the 5th grade in school I was selected to join the talented students group of The King Abdulaziz and His Companions Foundation for Giftedness and Creativity and from that time I became interested in computers and electronics. After that, I attended King Fahad University of Petroleum & Minerals (KFUPM) in Dhahran to study software engineering.

In that fast paced field, I found myself enjoying the pleasure of learning new things everyday. You can not manage to put your hand on everything, that for sure. but, you should not deprive yourself from the joy of exploring and discovering. as what Gandhi says: learn as if you were to live forever!
